

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

Claim 1 (previously presented): A pulley device for vehicle window lifters, comprising:

a revolving pulley;

a support device onto which the pulley is mounted, the support device is rigidly attached to an end of a window lifter rail; and the support device including at least one stopper;

wherein the support device is a flat member equipped with an opening at one end thereof for assembling the at least one stopper and includes means for positioning the at least one stopper at an angle.

Claim 2 (previously presented): A pulley device for vehicle window lifters according to claim 1, wherein the at least one stopper includes a tubular body attached to the flat member, the tubular body having a lower extension insertable into the opening on the flat member which has a substantially V-shaped cross-section to prevent the tubular body from being released from the flat member.

Claim 3 (previously presented): A pulley device for vehicle window lifters according to claim 2, wherein the means for positioning the at least one stopper at an angle includes a plurality of holes in the support device into one of which a pivot extending from the tubular body is inserted.

Claim 4 (original): A pulley device for vehicle window lifters according to claim 2, wherein the tubular body has side tabs which are supported on the flat member once the lower extension has been inserted into the opening.

Claim 5 (original): A pulley device for vehicle window lifters according to claim 1, wherein the support device has a positioning projection which extends downwards and is insertable into a hole in the rail to provide a departure angle preventing the support device from turning around an axis of the pulley.

Claim 6 (previously presented): A pulley device for vehicle window lifters according to claim 1, wherein the support device includes a rivet with a hole to attach the window lifter rail using the pulley.

Claim 7 (**currently amended**): A pulley device for vehicle window lifters ~~in-vehicle~~ ~~in accordance with~~ according to claim 2, wherein the support device includes a rivet equipped with a hole to fix the window lifter rail using the pulley.
